

# TaHoma® suite

- Connected solution for professionals
- Smart control for occupants
- IoT cloud platform
- E-maintenance tool
- Connected apps and services

### **The Project**

A pioneering company with a visionary intuition, **Somfy** has been making daily life easier for its customers for more than 50 years. Through innovative products and solutions, the Group strives to anticipate and respond effectively to the needs of its customers, as society and lifestyles change, to offer an increasingly more comfortable user experience.

When it comes to connected living, Somfy has revolutionized the market since 2011, with its first TaHoma® wireless gateway for connecting and controlling home devices. Ten years later, the internationally renowned French company launched **TaHoma® suite**, composed of three additional services to help installers. Among them is **TaHoma® switch**, the first intelligent controller for connecting and centralizing a home's devices.

To offer its users a simplified smart home experience, Somfy has partnered with **Overkiz** to offer a comprehensive, scalable, and secure end-to-end solution.

### The Challenge

- Increase the productivity of professionals in the field by eliminating repetitive tasks and paving the way for foolproof equipment installation
- Offer users a new way of living and enjoying the comforts of home
- Make it easier to maintain and troubleshoot connected equipment remotely, reducing the need for travel
- Ensure the solution's interoperability with a variety of heterogeneous brands, devices, and communication protocols
- Provide maximum security for data collection and management
- Make the most of nearly 15 years of trust with an expert partner capable of guaranteeing the solution's durability and scalability

A GLOBAL LEADER IN AUTOMATING HOME AND BUILDING OPENINGS AND CLOSURES

VELUX.

sensors, music and voice assistants

Cloud IoT and ecosystem

 Dedicated cloud architecture and open APIs Secure data collection and management Compatible with more than 300 product types: openings and access, lighting, security, heating,

# TESTIMONIAL

Convinced that we are stronger and can go further when we work together, the Somfy Group is committed to developing long-term collaborations with its technological partners. That's why we have decided to work again with Overkiz, a trusted partner for more than 10 years.

The technical mastery of their loT platform and the richness of their ecosystem, combined with the agility of their teams, made the successful development of TaHoma® suite possible. With the support of Overkiz experts, our future is even brighter, and we can imagine new innovations for the years to come, providing even more comfort to life.
