

The Overkiz Cloud platform

Launch your connected projects with confidence

In the complex world of IoT, Overkiz offers solutions to suit all your needs. Manufacturers, developers, and service providers alike can enjoy peace of mind when connecting their products and creating Smart Home and Smart Building services.

We'll let you focus on your goals...

- **Connect** your products easily
- **Offer new services** to your customers along with enhanced experiences
- **Integrate a world** of compatible brands
- **Create value** from your data
- **Develop** your own interfaces and services
- **Create your own customized management app** quickly and affordably

... we'll take care of the rest.

- **The platform with the most brands, devices, and protocols on the market:** an open environment with unrivaled compatibility, for seamless interoperability.
- **A versatile and fully scalable cloud with à la carte connectivity:** via our gateways, direct connection, or cloud-to-cloud.
 - **A world of solutions:** from white-label Kizconnect® apps and gateways to APIs that allow you to develop your own interfaces and services.
 - **Real-time management of extensive data:** collection, prioritization, storage, and retrieval.
- **A priority on cybersecurity:** a secure and reliable platform covering the entire world thanks to our servers on three continents.

devices and 800,000
installed gateways

Testimonials

As a manufacturer, I want my devices to be able to connect directly, without having to worry about compatibility.

Kizconnect® makes it easy to market my «Smart Homes» with a gateway and app, all in the blink of an eye.

Being able to provide services using collected data enhances an operator's value.

OVERKIZ | A BRAND OF **SOMFY** GROUP

Overkiz is a French company specializing in the design and development of white-label Smart Home and Smart Building solutions. Professionals: We are here to support you in your digital transformation! You can quickly launch innovative connected services, improve resident comfort and safety on a daily basis, and increase the energy performance of buildings.
